

English courses
Age 6–12

Primary Plus

A learning adventure your child will love

New and improved for a more
rewarding learning experience

English classes that go further, so your child can go further too

With Primary Plus your child will learn English, and so much more. Our improved approach will help your child develop confidence that goes beyond their language skills.

Happy learners make confident speakers

We provide a safe, supportive and relaxed place to learn, where everyone feels welcome.

Tailored to your child's age and personal development, we create a fun and memorable way for them to learn English.

When it comes to teaching English, we set the standard

Our world-leading English courses are shaped by 80 years' experience, created by a team of education experts. Our 2,500 teachers undergo extensive ongoing training every year.

Qualified teachers, trained to inspire

Our teachers will help your child make progress by focusing on their natural interests.

Turning curiosity into confidence

By getting to know how your child learns, our teachers know how to nurture their curiosity, and keep them motivated.

We want your child to have the courage to try new things, and turn every mistake into a triumph. That's why we teach in small groups, where every child can go at their own pace.

400,00 learners come to us every year and we are trusted by parents worldwide.

Spark their imagination. Shape their future.

Modular English learning, designed by experts, delivered with high-quality materials.

Each module is based around a magazine that focuses on a real-world topic that children are naturally interested in. Each lesson is brought to life with practical tasks and projects that your child will work on with classmates.

This gives them plenty of opportunity to build listening, speaking, reading and writing skills.

In one module, your child will design the city of the future. In the next, they will work out how a news report is put together. Our courses offer something new at every stage, so children keep learning and growing.

Your child will make friends along the way, and learn about themselves too.

We partner with Oscar-winning studio Aardman to engage young imaginations. Having fun with Shaun the Sheep and friends is a unique and memorable way for children to learn a language.

Space to learn. Support to grow.

For children aged 8-11

Our new, improved approach helps your child come to class more prepared, engaged and motivated.

Your teacher sets your child activities to do online at home so they can learn at their own pace. This will help them feel more confident and make more progress.

Before

At home

Activities, quizzes and games to prepare for class and build reading, listening and vocabulary skills

During

In class

More time to communicate with your teacher and classmates, practise grammar and receive more personalised feedback from your teacher

After

After class

Reflect and review, track progress, identify areas for improvement and celebrate success

For children aged 6-8

Interactive activities, videos and games will help them continue learning and practising their language skills at home.

Real-world topics build real-world skills

Primary Plus classes cover varied real-world topics to motivate every child – whether that’s solar power or fashion design.

Each class is built around interactive tasks that encourage students to think and learn in creative ways, building skills like leadership, problem solving and critical thinking.

You’ll see them become more resilient and keen to express themselves – so they’re ready for secondary school, and for the future.

The next page gives examples of what your child will do at each stage to grow in confidence and gain vital skills for their future.

human hand

Making progress

Our teachers take a personalised approach by measuring each child against themselves to keep them motivated.

As your child learns you can follow their progress, and see how they grow over months and years into self-assured, independent students.

Here are some guidelines of what you can expect your child to achieve at each stage of their learning journey.

Ages 6–7

Describe surroundings

Express feelings

Read and write with confidence

Ages 8–9

Share ideas

Practise new vocabulary

Reflect on interests and hopes for the future

Read independently

Ages 10–11

Explore issues affecting society and the environment

Find solutions

Present and compare ideas and opinions

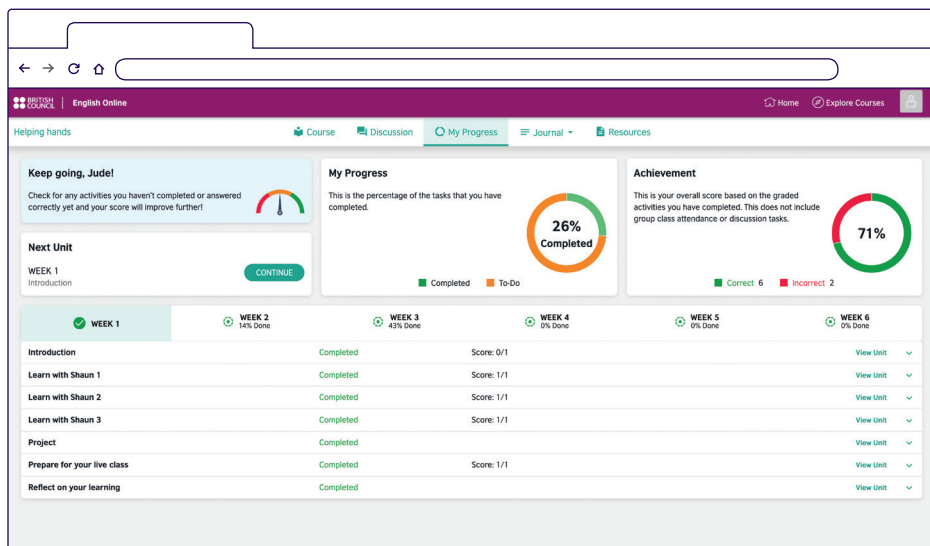

Write stories

Your window into the classroom

Your child's progress through the online guided learning is tracked, scored and presented in a personalised dashboard.

Together you can celebrate success and note areas for improvement.

Your child's teacher will feed back on any uploaded work on the dashboard, and provide a written report on your child's progress at the end of each term.

A safe and inclusive learning environment

We create a safe place for your child to be themselves.

We have the highest standards for child protection and have robust measures in place to keep your child safe when they are learning in our classrooms and online.

Covid-19

The health, safety and well-being of all our staff and customers is our top priority.

You can be assured that we have put in place measures in line with government guidelines to keep you and your child safe when you visit our centres.

In the event of a second wave of Covid-19, we may have to close our centres again. We have the systems in place so that your child's learning experience will continue online with minimal disruption for them.

Ask our team for more information.
